

# 2ND GRADE

## LANDFORMS

Hi 2nd graders! Let's look back at one of the fun lessons we had this year - when we learned about Landforms. Do you remember? We used PLAYDOUGH to create a landform of our choice. (we all like playing with Playdough!) We also used sticks, forks, lego people and animals and anything else we could find to make our landform look as real as possible.

### **Why don't you try this at home!**

Check out the attached Google Slide presentation (Landforms) to refresh your memory about the different landforms we learned about and what you can choose from -- Or you can check out the pictures at the bottom of this page. What are their characteristics? Where would you find these landforms? Near water or further inland? Would you find animals there? What kind? Can people live there?

### **If you don't have playdough, try these options to create your landform**

- \*Clay
- \*Blocks or legos
- \*Use items from your backyard (sticks, dirt, rocks, etc)
- \*Draw a picture of your landform using crayons or color pencils
- \*Paint a picture of your landform using water colors
- \*Use chalk on the sidewalk outside

The 'A' in STEAM stands for Art so get creative! Add as many details as you want and show your family your creation!

## LANDFORM TYPES

**Island**

**Lake**

**Ocean**

**Desert**

**Waterfall**

**River**

**Hills**

**Mountains**

**Volcano**

**Glacier**

**Canyon**

**Plain**
